

IMPORTANT NOTICE

After consulting numerous sources and colleagues, we have decided that it is in the best interest of our staff, patients and the public, that **Simcoe Foot Care & Custom Orthotic Centre will be closed, effectively immediately, until at least March 30, 2020.**

As you are already aware, COVID-19 is an imminent threat to our population's health and lives. Protecting our vulnerable patients, the majority of whom are over 65 or medically or immunologically compromised, is a major priority.

Perhaps even more importantly, making difficult decisions today, rather than waiting until tomorrow, we can play our part in social distancing by closing the clinic. By having staff and patients stay home, we can do our part in limiting the number of cases of COVID-19, slow the spread and lessen the anticipated major strain on our healthcare system.

As the majority of the procedures and services we carry out on a daily basis are elective in nature, I am certain this decision, although difficult to make, is for the best of the overall health our staff, patients, and community.

If you have an appointment at our clinic in the coming weeks, be assured we will do our best to be in touch with you to reschedule once regular clinic hours resume.

We sincerely value your understanding and wish you all wellness during this uncertain time.
